Vishnu Gajavada vishnugajavada Portfolio
Hyderabad, Telangana - 500067, India

Introduction

Software Engineer with hands-on experience building backend services, REST APIs, and software applications using Python and Java. Skilled in object-oriented programming, API development, Git-based development, software testing, and cloud-connected applications. Familiar with Microsoft Azure fundamentals, service-oriented architectures, and modern software development practices. Interested in building reliable, scalable cloud services and contributing across development, testing, deployment, and production operations.

Education

- **Vellore Institute of Technology** *2021 - 2026*
  M.Tech (Integrated) Vellore, India
  ◦ GPA: 8.05/10.00
- **Sri Chaitanya Jr College** *Graduation Year: 2021*
  Intermediate Hyderabad, India
  ◦ Percentage: 93.2%
- **Sri Chaitanya Techno School** *Graduation Year: 2019*
  Secondary Education Hyderabad, India
  ◦ GPA: 9.8/10

Skills

- **Programming Languages**: Python, Java, C++, JavaScript
- **Backend & API's**: FastAPI, REST APIs, JWT Authentication, Backend Development, Streamlit, React.js
- **Technical Skills**: Machine Learning, scikit-learn, NLP, Agentic AI, RAG, Software Testing, HTML, CSS, Data Visualization, OOPS, DSA
- **Tools**: Visual Studio, Eclipse IDE, Power BI, Jupyter Notebook, Git
- **Database**: SQL, MongoDB, Firebase Firestore
- **Cloud & Platforms**: Microsoft Azure (Fundamentals), Render, Streamlit Cloud
- **Soft Skills**: Problem-solving, Teamwork, Leadership, Adaptability, Communication

Projects

- **Savora – AI-Powered Restaurant Review Platform** *2026*
  Tech Stack: *Python, FastAPI, Streamlit, MongoDB Atlas, scikit-learn, VADER, JWT, Render*
  ◦ Built and deployed a full-stack review platform for 30+ Indian cities (FastAPI, Streamlit, MongoDB Atlas, JWT auth) with ML features: Isolation Forest fake-review detection, aspect-based sentiment, and TF-IDF recommendations.
  ◦ Optimized performance, cutting a listing payload from **1.4MB to 210KB** and trust-score computation time by ∼**3.3x**.
- **Farewise – Flight Fare Predictor with Best-Time-to-Book Advisor** *2026*
  Tech Stack: *Python, Pandas, scikit-learn, Streamlit*
  ◦ Built a flight fare prediction app on a public dataset that estimates ticket prices and advises the best time to book, comparing regression models on engineered features (route, airline, days-to-departure).
- **Alzheimer's Disease Classification Using Quantum Feature Extraction with GraphSAGE** *2025 – 2026*
  Tech Stack: *Python, PennyLane, PyTorch Geometric (GATConv, SAGEConv), Google Colab*
  ◦ Built a hybrid quantum-classical deep learning pipeline to classify Alzheimer's stages (4-class) from MRI images, achieving **~96% accuracy**, **~0.86 weighted F1**, and **~0.96 ROC-AUC**.
  ◦ Designed an 8-qubit variational quantum circuit (PennyLane) for feature extraction, integrated with a Hybrid GNN (4-head GATConv + dual SAGEConv layers).
- **Cricket Match Performance Dashboard** *Jan 2025*
  Tech Stack: *Power BI, SQL, Python, DAX*
  ◦ Developed an interactive Power BI dashboard to analyze player and team performance, with dynamic filtering by player, team, and tournament, and DAX-driven trend calculations.

Certifications

- **Microsoft Certified: Azure AI Fundamentals (AI-900)** *July 2024*
- **Automation Anywhere RPA (Center of Excellence)** *June 2024*

Achievements

- Published a research paper on Alzheimer's disease prediction at iConSCEPT 2025 (NIT Puducherry), IEEE
- Participant – Dataverse Hackathon conducted by IEEE WIE and IETE
